

LaundryCard™

Point Of Sale System

Take your store to the next level of automation by installing an advanced Point Of Sale system. This system is a full service Point of Sale and Back Office solution for counter services such as Drop-Off Laundry, Dry Cleaning, and Merchandising.

The integrated cash drawer, magnetic card swipe, and bar code scanner provide the customer with fast and easy ways to purchase soaps or laundry bags, or other items using cash, credit card, or their existing LaundryCard™!

The complimenting thermal printer can print both bar coded customer invoices and credit card vouchers within seconds.

The optional laundry scale provides the Attendant with a quick and accurate way to check-in bulk laundry for wash-and-fold or other over-the-counter services.

This highly configurable Point of Sale system can meet your Laundromat's needs by using pre-pay or pay at pick up options, inventory and discrepancy reports, and marketing tools such as coupons and a customer loyalty program! The back office reporting system has over a hundred reports available for printing, emailing or even downloading into Microsoft Word or Excel formats!
