

LaundryCard™

Credit/Debit Card Processing

Give Laundry customers more payment options! This optional feature allows the X-Changers to transfer funds from the customer's Credit or Debit card to their LaundryCard. Store-owners have flexible options on configuring acceptance and can control bonus options separately from cash sales.

The easy to use interface walks customers through the process of transferring funds from their selected credit/debit card to their LaundryCard.

If VPS is enabled the friendly X-Changer voice talks the customer through the transaction as well as visually showing instructional video on the screen. The transaction is presented in the customer's selected language and is integrated with the X-Changer so no additional wall space is required.

Reporting of credit card transactions are integrated with the existing LaundryCard report set. Easy to use reconciliation reports are made available to keep track of all transactions performed on the system.

Credit Card Acceptance requires high speed Internet access configured for CCI usage and sign up through a third party credit card processor.

Customers are now presented with a choice of how to add value to their LaundryCard. They can add cash to the X-Changer's Bill Acceptor or touch the option on the screen to add value using a credit card. Customers can even purchase a new card with their credit card.

Once the Credit Card option has been selected the system shows video and animations to help describe to the customer how to swipe their credit card. If the sound option is enabled, the friendly X-Changer voice will talk the customer through the process as well.

After the customer's card information is captured, the system prompts the user to enter the amount they wish to transfer to their LaundryCard. The on-screen video also helps to illustrate the next steps in the transaction. As in the previous steps if sound is enabled the X-Changer Voice will help the customer with the process.

All of the Credit Card processing is performed via the Internet and generally only takes a few seconds to approve. Once the transaction is complete, a receipt is made available (if the customer chooses) and all reporting information is saved for later review by the Store Owner.
